Gas Kettles

- Rotatable, domed cover with spring assist for easy cleaning.
- Sealed roller bearing pivot for easy tilting and longer life than brass bushings.
- 50 PSI (3.5 Bar) Steam Jacket Rating for higher temperatures and faster cooking and superior browning.
- Easy to replace O-ring gasket on tangent stem.
- High-efficiency power burner (on Gas models), provides efficient heat transfer, making for extremely fast heat-up and recovery with economical gas consumption.
- Hardened, adjustable tilt gears for long life and easy tilting.
- Water resistant controls and splash-proof design prevent water damage from spillage or cleaning.
- Solid State Temperature controls are accurate to within 1 C, and do not wander; perfect for delicate products and tightly controlled simmering.
- Additional leg, (4 total) on electric models with 80 gallon+ capacity for greater stability (all gas models come standard with 4 legs).

STEAM JACKETED KETTLE BENEFITS

50 PSI HIGH PRESSURE STEAM JACKET RATING (3.5 BAR BOILING PANS)

Stow Away your Stock Pots and Get Cooking with Steam

Cleveland steam jacketed kettles offer ultra efficient heat transfer, uniform heating and superior product handling. Steam jacketed kettles offer faster cooking times because two thirds of the cooking surface comes into contact with the product at a much lower temperature, compared to stock pots that use a much higher temperature only at the bottom of the pot. In addition, accurate temperature controls eliminate constant monitoring and resetting. Foods won't burn or scorch and you can hold product at a simmer without over cooking. Tilting models makes product handling simple. Clean up is easy since food isn't burned or over cooked like stock pots.

IDEAL FOR:

Soups, delicate sauces, pasta, gravies, desserts, stews, braising meats, rice, reheating dishes and holding them until serving.

INCREASES QUALITY AND PRODUCTIVITY:

- Heats from all sides and has 3-4 times larger heat surface than stock pots.
- Gentle uniform cooking.
- Faster cooking times using high energy steam.
- Precision temperature controls from a simmer to a rolling boil.
- No hot spots.
- Eliminates pot watching, constant stirring and large stock pots.

IMPROVES OPERATOR'S PROFITS BY:

- Reduces food waste due to over cooking and burning.
- Reheat meals without over cooking.
- Simmer food all day without over cooking.
- Simplifies and standardizes recipe and enhances recipe development.
- Improves Worker Safety:
 - Tilting models make pouring safe.
 - Eliminates heavy lifting and carrying hot stock pots.

SAVES ENERGY:

Kettles use 35% less energy than stock pots on an open burner. Keeps kitchens cooler.

SAVES TIME:

- Eliminates scrubbing of messy stock pots.
- Butterfly shaped pouring lip accurately pours product into containers for serving.

- Available on KET, KGT Series countertop self contained kettles.

TANGENT DRAW OFF VALVE

- Comes out the front of the kettle.
- 2" or 3" diameter size outlets.
- GOOD for pumping, only way to pump on electric models since Butterfly and Air Piston Valve not available on electric kettles.

Tangent Draw-Off with Acme Thread

3" BUTTERFLY VALVE

- Comes out the bottom of the kettle.
- BETTER for pumping since locate on bottom of kettle.
- Available on gas and direct steam, not available on electric kettle.

3" Butterfly Valve with Sani Style (Tri Clover) Clamp

3" AIR PISTON VALVE

- Air operated piston opens/closes on the bottom of the kettle, flush mounted at the bottom for Air-Tight Seal.
- BEST method for pumping.
- Available on gas and direct steam, not available on electric kettles.

TYPES OF CONNECTIONS FOR PUMPING

1. Sani Clamp (Tri Clover Clamp): Drain Valve is flanged on the bottom, Tri-Clover clamp used to connect hose to valve, easiest of the connections to attached and clean, accepted in USDA facilities.
 2. Acme Thread: Large threads on end of valve to screw on hoses. Very cleanable and accepted in USDA facilities
- When pumping, specify Sani Clamp or Acme Thread options, must be built on at factory.

3" Air Piston Valve with Acme Thread (Kettle bottom with valve in closed position)

EASYDIAL —
OPTIONAL CONTROLS WITH ADVANCED FEATURES FOR WORLD CLASS PERFORMANCE

Cleveland **standard controls** for tabletop kettles and T1 skillets offer simple precise, consistent solid state temperature controls with minimal temperature variance and superior cooking times.

The fully digital **easyDial®** control option is enclosed in a splashproof ergonomically angled console and offers the following key features.

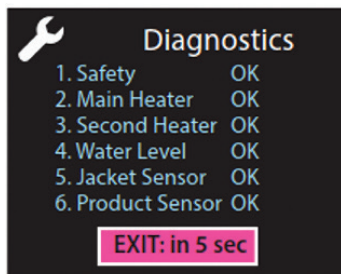

ACCURATE TIME & TEMPERATURE CONTROL

Precise temperature controls for consistent results and to help prevent overcooking and damaging the unit with burnt food.

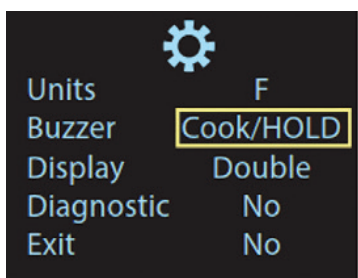

A loud audible buzzer indicates cooking is complete.

BUILT-IN DIAGNOSTIC READOUT

6 Built-In Self Diagnostics Indicators and Digital Readout. Simplifies troubleshooting, reduces maintenance costs and promotes first time fix.

THREE COOKING MODES

Cook/HOLD - Ideal cook and simmering applications brings food to a boil and then automatically goes into a simmering temperature. Eliminates waste due to overcooking and scorching.

Cook/ON - For cooking by time and temperature. The temperature will run continuously until manually turned off.

Cook/OFF - For cooking by time and temperature, the timer countdown turns off the heat.

CORE TEMPERATURE PROBE OPTION

Optional Core Temperature Probe can be used as an internal product probe for multiple products monitoring the core internal temperature for superior food quality.

MEETS IPX6 WATER RESISTANCE

Water related service issues are dramatically reduced.

RECOMMENDED PIPE CAPACITY

The figures below are based on 100 feet of clean iron pipe, allowing 10% pressure drop. The presence of valves, elbows, etc. was not considered in calculating the values shown. If the length of pipe is less than 100 ft., the pressure drop will be proportionately less than 10%. If the rate of flow shown for a given pressure and pipe size is increased, the pressure drop will be greater. If the rate of flow is decreased, the pressure drop will be less. The pressure drops to use depends on the circumstance.

MAXIMUM FLOW RATE OF DRY STEAM IN LBS. PER HOUR

STEAM REQUIREMENT DATA, BOILER SIZING INFORMATION

Use the following information to determine the steam flow rate requirements for any combination of Cleveland kettles or any combination of Cleveland steamers and kettles.

Example: First, determine the total steam flow requirement using the charts below. Cleveland boilers operate at 8-10 PSI, a 40-gallon kettle will require 70 lbs. of steam per hour, a 2-compartment steamer will require 60 lbs. of steam per hour. Total steam required is 130 lbs. of steam per hour.

Using the Steam Flow Rate of Cleveland boilers, a 300,000 BTU generator will product 180 lbs. of steam per hour, and the 24CGP10 also produces 180 lbs. of stem per hour, enough to run both the 2-compartment steamer and 40-gallon kettle.

STATEMENT OF POLICY

Cleveland Steam Cooking Equipment is intended for Commercial use only by professionally trained personnel.

Cleveland Steam Cooking Equipment is built to comply with applicable standards of manufacturers. Included among these approval agencies are: U.L., N.S.F., A.S.M.E./Ntl. Bd., C.S.A., A.G.A., C.G.A., E.T.L., C.E., and others. Many local codes exist, and it is the responsibility of the Owner and Installer to comply with these codes. Constant product improvement makes it necessary for new or improved models to be suited for testing by these various agencies. Therefore, not all models may always have all agency approvals. Cleveland Steam Boilers (Steam Generators) and Kettles are National Board registered and carry the approved stampings and listing of the American Society of Mechanical Engineers (A.S.M.E.). Cleveland Steam Cooking Equipment, when properly installed according to instructions, complies with the intent of the O.S.H.A. Act.

SALES POLICY

All orders must have the Dealer's name and address; shipping address; and installation location, including name, address and phone number before the order can be processed.

All orders should indicate model number, electrical characteristics, type of gas, altitude (if installation is over 2000 feet) and, when required, the incoming steam pressure.

Approved drawings, when required, and firm shipping date must be received before equipment can be scheduled for production.

Specify left or right door hinging for cooking compartments on Convection and SteamCraft® Steamers.

RETURN POLICY

- 1 | All returned product must have an RMA number from Customer Service prior to sending the product back.
- 2 | The product must be standard product, still in original packaging and within 90 days from date invoiced. Standard products are defined as product configurations that are saleable to the general market. Custom Products are product configurations that are unique to a specific customer and cannot be sold to other customers. Obsolete discontinued products cannot be returned.
- 3 | If return is approved for standard product, the standard restock charge is 30% or 20% if a replacement order is made.
- 4 | Custom product is non-returnable.
- 5 | Applicable freight charges and re-crating will be the customer's responsibility.
- 6 | RMA number must be clearly written on all shipping paperwork to factory/warehouse.
- 7 | RMA will be valid for 45 days from date of issue.

PRESSURE BOILER AND STEAM GENERATOR MAINTENANCE IS THE RESPONSIBILITY OF THE OWNER-USER AND IS NOT COVERED BY THIS WARRANTY. The use of good quality feed water is the responsibility of the Owner-User (see Water Quality Recommendations below). THE USE OF POOR QUALITY FEED WATER WILL VOID EQUIPMENT WARRANTIES. Boiler maintenance supplies, including boiler hand gaskets, are not warranted beyond the first 90 days after the date the equipment is placed into service. Preventive maintenance records must be available showing descaling per applicable Cleveland Operator Manual for Boiler

CLEVELAND RANGE — LIMITED WARRANTY

CLEVELAND RANGE products are warranted to the original purchaser to be free from defects in materials and workmanship under normal use and service for the standard warranty period of one year from date of installation or 18 months from date of shipment, whichever comes first.

CLEVELAND RANGE agrees to repair or replace, at its option, f.o.b. factory, any part which proves to be defective due to defects in material or workmanship during the warranty period, providing the equipment has been unaltered, and has been PROPERLY INSTALLED, MAINTAINED, AND OPERATED IN ACCORDANCE WITH THE CLEVELAND OWNER'S MANUAL.

CLEVELAND RANGE agrees to pay any FACTORY AUTHORIZED SERVICE (FAS) AGENCY (within the continental United States, and Hawaii) for reasonable labor required to repair or replace, at our option, f.o.b. factory, any part which proves to be defective due to defects in material or workmanship, during the labor warranty period. This warranty includes travel time not to exceed two hours and mileage not to exceed 50 miles (100 miles round-trip), BUT DOES NOT INCLUDE POST START-UP, TIGHTING LOOSE FITTINGS, MAINTENANCE, CLEANING OR DESCALING.

The standard labor warranty allows factory payment of reasonable labor required to repair or replace such defective parts. CLEVELAND RANGE will not reimburse the expense of labor required for the repair or replacement of parts after the standard warranty period, unless an Extended Labor Warranty Contract has been purchased to cover the equipment for the balance of the warranty period from the date of equipment installation, start-up, or demonstration.

PROPER INSTALLATION IS THE RESPONSIBILITY OF THE DEALER, THE OWNER-USER, OR INSTALLING CONTRACTOR, AND IS NOT COVERED BY THIS WARRANTY. Many local codes exist, and it is the responsibility of the owner and installer to comply with these codes. CLEVELAND equipment is built to comply with applicable standards for manufacturers, including UL, AGA, NSF, ASNE/Ntl. Bd, CSA, CGA, ETL and others.

PRESSURE BOILER AND STEAM GENERATOR MAINTENANCE IS THE RESPONSIBILITY OF THE OWNER-USER AND IS NOT COVERED BY THIS WARRANTY. The use of good quality feed water is the responsibility of the Owner-User (see Water Quality Recommendations below). THE USE OF POOR QUALITY FEED WATER WILL VOID EQUIPMENT WARRANTIES. Boiler maintenance supplies, including boiler hand gaskets, are not warranted beyond the first 90 days after the date the equipment is placed into service. Preventive maintenance records must be available showing descaling per applicable Cleveland Operator Manual for Boiler Proration Program considerations.

The foregoing shall constitute the sole and exclusive remedy of original purchaser and the full liability of Cleveland Range for any breach of warranty. THE FOREGOING IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, OR IMPLIED, INCLUDING ANY WARRANTY OF PERFORMANCE, MERCHANTABILITY, OR FITNESS FOR PURPOSE, AND SUPERSEDES AND EXCLUDES ANY ORAL WARRANTIES OR REPRESENTATIONS, OR WRITTEN WARRANTIES OR REPRESENTATIONS, NOT EXPRESSLY DESIGNATED IN WRITING AS A "WARRANTY" OR "GUARANTEE" OF CLEVELAND RANGE MADE OR IMPLIED IN ANY MANUAL, LITERATURE, ADVERTISING BROCHURE OR OTHER MATERIALS.

CLEVELAND RANGE'S liability on any claim of any kind, including negligence, with respect to the goods or services covered hereunder, shall in no case exceed the price of the goods or services, or part thereof, which gives rise to the claim. IN NO EVENT SHALL CLEVELAND RANGE BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES IN THE NATURE OF PENALTIES.

CLEVELAND RANGE — LIMITED WARRANTY (CONT.)

PRESSURE BOILER — STEAM GENERATOR WARRANTY

All Pressure boilers and steam generators will receive an additional 4 year prorated limited parts warranty after one year from effective warranty date. The user shall pay a prorated share of the selling price based on number of months in service. Prorated Coverage: 1 Year 100% - 2 Year 80% (100% with purchase of filter) - 3 Year 60% - 4 Year 40% - 5 year 20%.

PERFORMANCE START UP & DEMONSTRATION

Performance Start up by Factory Authorized Servicer included at customer request after equipment is installed to ensure equipment is installed properly and performing as designed. Included in the startup is a Free Water Quality Check (Contact Cleveland sales representative for details).

THREE YEAR WARRANTY K-12 SCHOOL WARRANTY

For K-12 Schools, extended two-year limited warranty at no additional charge, not to exceed 24 months from date of installation. 3rd Year Water Filter Warranty included, see details below.

3-YEAR STEAMER DOOR WARRANTY, DOOR GASKETS AND ADJUSTMENTS

3-year limited parts warranty on 3, 5, 6 compartment steamer doors (Gaskets covered under 1-year limited warranty). Non part replacement adjustments on steamers, kettles and tilt skillets (lose wires, clamps, leaks) covered under 1-year limited warranty.

EXTENDED WATER FILTER WARRANTY

When purchasing a steamer and Cleveland specified water filter from Cleveland Ranged at the same time, a second year limited extended warranty on will be included at no charge, must include a completed Performance Start-Up and water quality check. Must maintain equipment and filter replacements.

EXTENDED WARRANTY

The purchase of a Limited Extended Warranty Contract extends the standard warranty coverage to the purchased period demonstration, or 18 months from date of shipment, whichever comes first. Individual warranties may vary by model, part or application. Major components have labor extended an additional year with the purchase of an extended warranty, but not parts. Extended warranties are non-transferable. Only available in the 48 contiguous US states (Hawaii and Alaska are excluded).

- Performance Start up required for extended warranty coverage.
- Extended Warranty must be purchased at the same time the equipment is purchased.
- Extended Warranty has the same exclusions as stated in our standard warranty.

WATER TREATMENT SELECTION GUIDE

1 UNDERSTAND THE BASIC WATER CHARACTERISTICS OF YOUR WATER

Compare water quality at your location to the Cleveland Water Quality Requirements listed here.

- Contact your water company for information about the quality of your water.
- Cleveland can provide a complete water analysis through an independent laboratory

CLEVELAND WATER QUALITY RECOMMENDATIONS			
Total Dissolved Solids (TDS)	50 - 250 ppm	Cl ₂ (Free Chlorine)	max .01 ppm
Hardness	50 - 200 ppm (3-12 gpg)	Fe (Iron)	max .01 ppm

Optipure OP Series systems utilize reverse osmosis (RO) to remove total dissolved solids (TDS) from water, including chlorides and hardness mineral. Then balance of minerals is introduced into the pure water to provide desirable "Optimized" water with a stable, non-aggressive nature that can significantly reduce water-related equipment problems including corrosion and scale.

Optipure FLT0040 recommended for Cleveland steamers with steam generators reduces chlorine/ chloramines and takes out sediment down to micro and includes IsoNet™ scale inhibitor.

Optipure QFLT0043 recommended for use with steam generators, reduces chlorine and takes out sediment down to micron. ScaleX2 uses "template assisted crystallization" to effectively minimize scale formation at high.

COMPLETELY SELF — CONTAINED COOK CHILL SYSTEM

FEATURING A 60, 80 OR 100 GAL. SELF CONTAIN GAS HORIZONTAL MIXER KETTLE AND SELF CONTAINER PRODUCT CHILLER

Cleveland Cook Chill Systems can now be designed for smaller to mid-size operators looking to start a USDA and FDA cook chill food processing operation. Cleveland HA-G Self Contained Cook Chill Systems cooks food to a "just done state" packaged in heavy duty casings at pasteurization temperature, then rapidly chilling to 40°F in less than one hour, enabling the "Fresh" product to be stored in a refrigerated food bank at 28°F to 32°F up to 4 weeks. No external steam boiler or ice builder is required for the HA-G Cook Chill System.

1. MIXING / COOKING

HA SERIES MIXER KETTLES (HAMKGLTCC, HAMKELTCC)

Cleveland's self-contained high efficiency gas fired, and self-contained electric horizontal mixer kettles eliminates the need for an expensive large industrial boiler. Available in 60, 80 & 100 gallon models, tilting or stationary. Cleveland's patented HA series horizontal agitator lifts and folds heavy, delicate, chunky, or thin products.

2. PACKAGING

FOOD PUMP (MFS)

Cleveland' MFS model food pump provides a gentle but efficient transfer of hot and cold food from the mixer kettle into heavy duty casing pouches at the desired set amount, then safety seals the casing for chilling. The MFS-U100 model food pump can also fill retail cups and jars.

3. CHILLING

PRODUCT CHILLER/BLAST CHILLER (HBC075, HBC100 & HBC200)/(KBC750BC-2T & 3T)

Cleveland HBC series Product Chiller has built in direct-expansion refrigeration that rapidly reduces the temperature of the filled casings. No ice builder is required. Turbulent circulated flow provides full agitation to provide the most optimum rapid cooling. Available in 75, 100 & 200 gallon tank sizes. Now offering Kolpak by Cleveland walk-in blast chillers for this function as well.

SUPPORT REQUIREMENTS

The Cleveland Self Contained Cook Chill system requires no Ice Builder refrigeration or remote boilers, only a condensing unit for the product chiller. Compressed air is required for pumping from the kettle to the food pump.
